CAPRISEAL SHIELD 3 MM APP MODIFIED POLYESTER REINFORCED BITUMINOUS WATERPROOFING MEMBRANE

Capriseal Shield 3 mm App Membrane plastomeric compound with polyester reinforcements that are impregnated and coated with a mixture of APP polymer modified bitumen. Capriseal Shield 3 MM App Membrane exhibits excellent tensile strength, tear strength, puncture resistance and dimensional stability. The torch side of the membrane is covered with polyethylene film for protection of the membrane. Polyethylene Film on top and bottom side of sheet.

Capriseal 3mm APP also uses as Dam proof courses treatment for underground construction, civil and engineering works.

Features:

- Superb Flexibility
- High Tensile Strength, Tear and puncture resistance
- High temperature resistance to cold and warm temperatures
- Durable in comparison to conventional low end waterproofing systems

Uses:

Can Apply Capricorn Shield App Membrane in horizontal and vertical application for protection of various substrates like concrete, masonry, GI, aluminium, wood etc. in wide range of uses:

- Bridges & Tunnels
- Medium to large roof slabs in domestic, commercial and industrial construction swimming pools
- Roof Gardens
- Basement Slabs & Underground car parks etc.
